

Specialists in Airline Security Worldwide

Brooks seals perform eight security tasks

- *Protect crew, passengers, cargo and aircraft*
- *Control access*
- *Make security visible*
- *Safeguard valuables*
- *Meet demands for tamper-evident security*
- *Secure in-flight duty-free trolleys and bar carts*
- *Protect food and beverages from commissary to aircraft*
- *Prevent the addition of unauthorized items within food and beverage carts*

Only Brooks offers cost-effective sealing with several degrees of security

E.J. Brooks Company's security seals and locking devices are designed to help the airline industry guard against theft, contamination, contraband or potential threats.

Brooks provides an extensive inventory of the world's most effective indicative and barrier seals to meet every security need. All seals are designed to help airlines protect crew, passengers, cargo and aircraft.

Sealing is a safety imperative in the airline industry. Whatever your security requirements, we offer the broadest line of seals and locking devices to address all of your needs.

Choose Brooks seals for:

Delivery vehicles

Safeguards content; assures that no unauthorized items are added or removed

Food Trolley

Ensure that no unauthorized items are added to the trolley in transit from kitchen to aircraft

Bar Cart

Safeguard beverages and revenues from in-flight sales.

General On-Board Security

Safeguard head-sets, newspapers, blanket amenities and vital equipment

Select the appropriate seal for the job based on these factors:

- tamper evidence
- degree of security protection
- bar-coding
- consecutive numbering
- color coding
- value of item being sealed
- sealing application

An airline case-history Saving costs while securing inventory

Brooks Bar-Coded Plastic Padlock Seals have helped a North American-based airline identify what goes on and off every aircraft. The program is helping stem losses incurred from the sale of alcoholic beverages on-board. Bar coded seals also increase the speed and accuracy of inventory.

Secure sensitive documents with Secur-A-File

Secur-A-File Zippered Bags give clear evidence of unauthorized access. Secur-A-File offers a locking chamber where numbered security seals are affixed. Ideal for sensitive documents used by flight crews.

Brooks Patent Numbers:

4,506,921; 3,830,538; 4,697,833; 5,524,945; 5,441,316; 5,533,767; 4,059,300; 4,588,218; 4,983,853; 4,254,977; 4,687,240; 4,278,281; 5,419,599; 5,180,200; 5,884,949; 6,000,736; 6,007,121; Canadian Patent 1,331,083 and 1,319,811; European Patent 0223905; Brazil patent PI 86025465 and other U.S. patents pending.

Indicative Seals

let you know if someone has gained entrance to a truck, trolley, container or sealed object and whether tampering has been attempted. They deter theft, tampering, and storage of unauthorized items such as weapons, drugs or explosives. They are generally plastic and are removed by hand pressure or a sharp instrument.

Ring Pull™ Seal

Adjustable multi-purpose plastic seal.

- Over 20 locking positions
- Self-locking—no tools required—easy removal

DESIGNED EXCLUSIVELY FOR THE AIRLINE INDUSTRY

Ring-Pull Seal installed on aircraft liquor cabinet

High Security Spring-Lok Seal®

Durable, self-aligning plastic seal with metal locking clip

- Affords greater strength and security
- Heat stamped or bar coded

Secur-Pull® Seal

Plastic seal with metal locking clip.

- Narrow tail fits small sealing apertures
- Ideal for luggage-delivery carts and waste bags

Secure-Grip® Seal

Plastic seal with metal locking insert.

- Smooth tail for ease of sealing
- Optional gripping prongs for laundry bags

Spring Air Seal

All-plastic seal with patented hinge.

- Self-aligning; one-handed closure
- Tamper-evident: Hinge keeps seal open if violated

DESIGNED EXCLUSIVELY FOR THE AIRLINE INDUSTRY

Spring-Air Seal installed on aircraft food cart

Split-Lok®

Unique combination of plastic & metal.

- Body with thin central membrane—splits if attacked or tampered
- Wire ends retained in plastic body on removal

Secur-Hasp II®

Special hasp configuration that deters tampering.

- Metal hasp penetrates body of seal if tampered with
- Accepted by US Customs for aircraft bar box use

Bar Coded Enduro Seal

Self-destructing insert destroys bar code label if tampering occurs

- 3 bar coded symbologies: Interleaved 2 of 5, Code 39 or Code 128

Poly-Check Seal

Fixed-length plastic seal for in-flight vehicles and luggage delivery carts

- One piece design for maximum security
- Break point for easy seal removal

Poly-Lok II® Seal

Indicative seal for delivery vehicles and general purpose use.

- Integrated break point for ease of removal
- Locking chamber provides proper sealing engagement

Barrier Seals

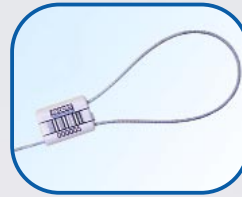

are constructed of zinc bodies with attached cable or steel bolts and locking cases. They provide barriers to entry and protect duty-free valuables from theft. Cable or bolt cutters are required for removal.

Intermodal III Bolt Seal

Hardened-steel bolt and locking end

- Plastic shroud fractures to reveal tampering attempt
- Heat-stamped company name & consecutive numbers

Multi-Lok® Seal

High-security disposable cable seal

- Metallic or in a variety of colors
- Provided with company name & consecutive numbering

Nifty Lok®

Economical high-security cable seal

- Cable is non-preformed 1/16" galvanized steel
- Decorated with company name & consecutive numbers
